DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-17, drawn to a method for producing glass-ceramic parts.

Group II, claim(s) 18-24, drawn to an infrared radiation device.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The special technical feature of radiation acting indirectly on the glass blank /or the glass-ceramic blank of more than 50% of the total radiation output is not shared by groups I and II. Group II claims are directed to device having no means for providing radiation acting indirectly on the glass blank /or the glass-ceramic blank of more than 50% of the total radiation output. The limitation of "for carrying out the method as per claim 1" is being considered as an intended use of the device, hence not limiting the claimed device per se.

A telephone call was made to John Hoffman on 6/18/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
